Re: Review of Form and Amount of Reclamation Surety, Larson Limestone Company, Pelican Point Mine, M/049/011, Utah County, Utah

Dear Mr. Larson:

Thank you for your recent submittal of the final reclamation surety documents with our office. Please accept our apology for the unforeseen delay in responding to your submittal. Following a standard review of the documents by our legal counsel, there are a couple minor corrections/additions that will need to be made before the Division Director can sign and formally approve of these documents. The necessary changes are as follows:

1. FORM MR-RC, Page 2 of 7, Operator's Registered Agent - This section lists the company's attorney, Mr. Wayne B. Watson instead of the State Division of Corporation's listing of Macey Buker as the official Registered Agent for the company. This change will need to be made to this document. A clean copy of page 2 is enclosed. Your attorney should initial and date this change.
2. Attachment "A", the legal description of the disturbed lands is not accurate enough to be acceptable to the Division. At a minimum, the disturbed area legal description should be described to the nearest 1/4, 1/4, 1/4 section(s), including the township, range, base meridian, county and state. A detailed disturbed area boundary map of adequate scale (showing township, range and sections) of the permitted/bonded area would also be useful in clarifying the legal description of the lands covered under the reclamation contract and surety. A reference to an existing map in the mine plan application may satisfy this provision.

We apologize for any additional inconvenience this may cause and thank you for your help and patience in finalizing this permitting action. Please call me at (801) 538-5286 or Lynn Kunzler at 538-5310 if you have any questions in this regard.

Sincerely,

D. Wayne Hedberg
Permit Supervisor
